

# CGO Software

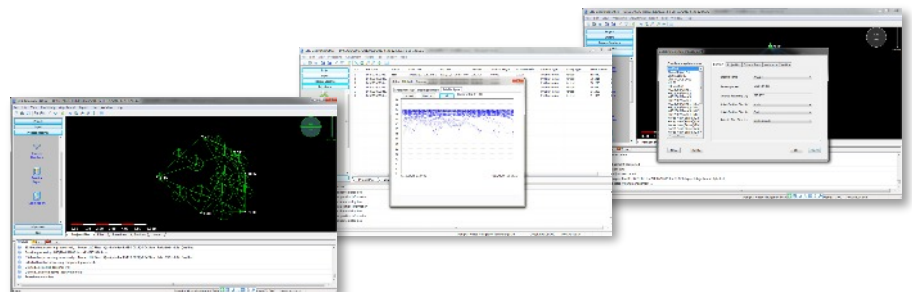

## CHC | Geomatics Office Software Powerful GNSS Data Post-processing Solution

### KEY FEATURES

- **Scalable - Process both Static and PPK projects seamlessly**
- **Powerful - Combine GPS, GLONASS and BDS raw data processing**
- **Compatibility - Supports GNSS raw data of major brands**
- **Automated Quality Control - Ensure the reliability and quality of GNSS RTK observations**

The CHC Geomatics Office (CGO) software is a desktop application software for post-processing all current GNSS Data (GPS, GLONASS and BDS). Designed for both static and Post-Processing Kinematic (PPK) applications, CGO also supports various raw data formats from major brands to allow a seamless integration with existing pool of equipments.

- ▶ Post-Process Static and Kinematic GNSS Surveys
- ▶ Support GPS, Glonass and Beidou data
- ▶ Multiple raw data import: CHC, Rinx, Trimble DAT, NOV, BD9, RAW
- ▶ Quality control threshold during the GNSS raw data import process
- ▶ Various reports: Baseline, network adjustment, loop closure...
- ▶ Multiple Export information: baseline file (\*.TXT, (\*.ASC) and LOG File
- ▶ Customized report setting to provide both adequate and comprehensive information
- ▶ Advanced feature using Precise Ephemeris downloading and processing
- ▶ Create projects with a wide selection of coordinate systems and height fitting options.

## System Recommendations

### Operation System

- Microsoft Window (32-bit version)
- Microsoft Window (64-bit version)<sup>(1)</sup>

### Processor

- Recommended: 2.0 GHz or higher

### Random Access Memory (RAM)

- Recommended: 2 GB or more

### Hard Disk

- Recommended: 5 GB or more
- Graphics: DirectX 9(or higher) compatible graphic card with 512 MB memory or higher
- I/O Ports: USB 2.0 port

<sup>(1)</sup> Under Microsoft Windows, requires Administrator Privileges

## License and Language

### Software License

- Single software code license based on individual computer identification

### Supported Language

- English
- Spanish
